

MOHD FAISAL ANSARI

Technical Lead / Senior DevOps & Cloud Engineer | AWS | Kubernetes | OpenShift | Terraform | CI/CD

Navi Mumbai, Maharashtra, India | +91-9990622210 | faisalansari4696@gmail.com | [LinkedIn](#) | [faisal.host](#)

PROFESSIONAL SUMMARY

Technical Lead / Senior DevOps & Cloud Engineer with 8+ years of experience across AWS, Kubernetes/EKS, OpenShift, Terraform, CI/CD and enterprise production operations. Hands-on experience in AWS infrastructure, Karpenter-driven Kubernetes scalability, cloud-native observability, DevSecOps and automation, with practical exposure to AI-assisted engineering.

CORE SKILLS

Cloud & AWS: AWS Cloud Engineering, EKS, EC2, VPC & Networking, S3, RDS, Load Balancing, CloudFront/CDN, IAM & Identity Center, WAF, CloudWatch, Lambda, Kinesis, SQS/SNS, Control Tower

Kubernetes & Containers: Kubernetes, OpenShift, Docker, Helm, Karpenter

IaC & Configuration: Terraform | Ansible, Chef

CI/CD & Automation: Jenkins, GitHub Actions, Bitbucket Pipelines, AWS CodePipeline, Git, Groovy | Bash, Python, Boto3, AWS CLI

Observability & Security: Prometheus, Grafana, Loki, Tempo | SonarQube, OWASP ZAP, Burp Suite, Trivy, Black Duck, AWS Secrets Manager, Sealed Secrets, SAML, PIM

Compliance & AI: GDPR, HIPAA, SAMA, DPDPA, RBI Regulatory Requirements | OpenAI, Claude, Gemini, Antigravity

PROFESSIONAL EXPERIENCE

STATE BANK OF INDIA (SBI) — Deputy Manager (Systems)

Sep 2025 – Present

YONO 2.0 – Foundation Services & Infrastructure

- Actively involved in building and configuring additional production OpenShift (OCP) environments across geographically distributed data-center environments.
- Perform OCP cluster-level configuration, platform setup, validation and troubleshooting within controlled banking change, security and access processes.
- Support and monitor critical platform components including OpenShift, GemFire, Kafka, Istio, Liferay and AWS CloudFront/CDN, focusing on platform health, availability and production operations.
- Design and maintain Grafana dashboards and use Prometheus metrics and centralized logging for monitoring, troubleshooting and production issue analysis.
- Investigate CPU, memory, resource-utilization, performance and service-health anomalies; monitor Kafka consumer lag and support GemFire health/resource monitoring.
- Participate in deployments, post-deployment validation, production changes, incident coordination and infrastructure onboarding/access workflows.
- Applied security and operational controls aligned with DPDPA and applicable RBI guidelines for regulated banking environments.

INCEDO — Technical Lead (DevOps)

Jan 2025 – Sep 2025

- Worked across AWS services, developing and maintaining Terraform configurations and implementing Terraform execution through GitHub Actions pipelines.
- Developed Python automation scripts and applied AI-assisted engineering workflows using Generative AI tools for productivity and technical problem-solving.

Selected On-Premises Platform Automation

- Enhanced Bash and Jenkins automation for deployable on-premises VM appliances, integrating MicroK8s installation, container image packaging and Kubernetes application deployment.
- Worked on dependency and artifact packaging using AWS S3, Git/Bitbucket repositories and Kubernetes/Helm deployment assets.
- Developed Kubernetes Sealed Secrets automation using Bitnami Sealed Secrets and kubeseal for secure secret deployment.
- Enhanced operational automation for Kubernetes readiness checks, workload management, backup/restore and platform diagnostics; applied HIPAA/GDPR requirements across workflows.

BINMILE TECHNOLOGIES — Sr. DevOps Engineer (AWS)

Jun 2024 – Jan 2025

- Designed and provisioned AWS infrastructure using Terraform, including EKS, VPC and supporting cloud resources across multiple environments.
- Extensively worked with Amazon EKS and Karpenter for dynamic node provisioning, node lifecycle and capacity management, workload-driven scaling and Kubernetes cluster scalability.
- Designed and implemented an observability stack using Prometheus, Grafana, Loki and Tempo, covering metrics, dashboards, logs, traces and alerting.
- Built and maintained CI/CD pipelines using Jenkins and Bitbucket, integrating secure secret-management practices into deployment workflows.
- Implemented DevSecOps practices using SonarQube for SAST, OWASP ZAP and Burp Suite for DAST, and Trivy and Black Duck for container security.
- Worked on AWS networking, identity and security, including VPC networking, IAM/Identity Center, SAML integration and secure cloud-to-on-premises connectivity.

- Developed automation using Python/Boto3, Bash and AWS services while supporting production troubleshooting and reliability improvements.
- Applied security and compliance-driven controls across cloud and DevOps environments, considering GDPR, HIPAA, SAMA and DPDPA requirements.

EYE CARE LEADERS (now Sightview) — DevOps Engineer (AWS)

Feb 2023 – May 2024

- Automated application build and deployment workflows using Jenkins Declarative Pipelines, troubleshooting Groovy-based pipeline issues.
- Contributed to building AWS Control Tower Landing Zone environments and designed/managed AWS infrastructure using Terraform.
- Built Jenkins CI/CD pipelines to automate VMware Cloud VM migration workflows, contributing to Python automation using the pyVmomi API for vCenter integration.
- Developed Python/Boto3 automation for AWS instance scheduling and S3-to-RDS backup and restore workflows.
- Used Chef configuration management to automate and standardize server and application configurations across environments.
- Applied security and compliance requirements related to HIPAA and GDPR across infrastructure and DevOps workflows.

VIKING PAYMASTER PVT LTD — Senior Executive – Software Development Analyst

Mar 2019 – Feb 2023

- Managed and optimized AWS infrastructure with focus on performance, security, reliability and cost optimization.
- Designed and implemented Jenkins-based CI/CD pipelines and Chef configuration management to automate application delivery and standardize configurations.
- Containerized applications using Docker and implemented Nginx-based web and load-balancing infrastructure.
- Configured AWS Site-to-Site IPSec VPN connectivity to establish secure communication between environments.
- Developed and maintained Python/Odoo applications while independently handling DevOps, infrastructure automation and production troubleshooting.

INDICSFT TECHNOLOGIES PVT LTD — Software Engineer (Python/Odoo/AWS)

Sep 2018 – Feb 2019

- Started career across Python/Odoo application development and AWS infrastructure, gaining hands-on experience in application deployment, troubleshooting and technical operations.
